**Horse:** Zoustar x Classic Guitar brown colt 15  
**Brands** n.sh: V over bar rolled J P off.sh: 27 over 5  
**Pedigree as in the catalogue.**

At the request of Jamie Walter of Proven Thoroughbreds, a pre-purchase veterinary examination of the above horse was undertaken at the Inglis Sales Complex, Newmarket, Sydney on 06/04/2017.

#### Clinical Examination

The clinical examination included heart auscultation, ophthalmic eye examination, teeth examination, limb flexion and joint palpation which were normal. The sheath and testes were normal in appearance and the testes normal on palpation. There was no evidence of previous abdominal surgery, infection or disease, laminitis or ataxia. The horse was in very good health (condition score 3). The horse was examined at rest and at the walk only.

This was an attractive, improving type of horse who was a good size for his late October birth date. Time will be of benefit for his body to strengthen. This horse showed a very good walk and turned well.

#### Radiographic Examination

The standard set of 36 radiographs was examined in the repository. The radiographs showed bilateral lateral trochlear ridge OCD surgical defects which had healed. A report in the repository indicated that surgery was undertaken on 23 August 2016 when a small chip was removed from the right hind fetlock joint also which shows no evidence on x-rays. Low risk.

In my opinion, at this time, the colt presented as suitable for purchase as a racehorse as can be determined from the examination performed as described. The colt is suitable for public syndication and mortality insurance.
